

Aquaculture Project - Final Presentation

You (or your group, if you worked in a group) will be presenting your Aquaculture Project.

Your presentation can be in any form. Possible examples include posters, videos, and powerpoints.

Your presentation must answer the following questions:

- What species do you want to grow?
- Why do you want to grow this species?
- What water body do you want to grow the species in?
- Why do you want to use this water body?
- Will this species grow well in this water body? Include information for the species and the water body about:
 - Turbidity
 - Salinity
 - Temperature
 - pH
 - Dissolved Oxygen
- Can your species can be part of a polyculture?
 - Should it be part of a polyculture?
 - What combination of species would you use in a polyculture?
- What kind of impact will your aquaculture project have on the water body and surrounding environment?
