

Wheelbarrow

<https://youtu.be/TwFyWeRi43w>

Liz DePoy: OK, so this is the next step in the hay feeding sequence, and this wheelbarrow, which was introduced to us by Richard Brzozowski – I never knew it existed - is the best thing ever. So, it is lightweight and its motorized, so all I have to do to feed hay is turn it on, there's a little toggle switch over here, and over here there's a back-up or go-forwards switch, so usually what I do is I place it– I can even manage it with one hand. Now I wheel over to the hay pile, and take, you know, as many flakes as I need for the feeding, and put them in the wheelbarrow, and again this is you know – if I need to back it, I can do that and I just go forward, and feed it out where I need to.
