

THE UNIVERSITY OF MAINE Cooperative Extension

Three common sheets throughout the session

- Income statement
- Cash flow statement
- Balance sheet

Financial Statements and List of Required Records Statement **Records Required** Balance Sheet Farm Assets Cost & Value Farm & Personal Asset Changes Livestock, Crop & Other Product Inventories Loan Balances Farm Income & Expenses Cash Flow Non-Farm Income & Expenses Debt Payments Farm Income & Expenses Enterprise Budget Analysis Livestock & Crop Yields Income Statement Farm Income & Expenses Interest Payments Livestock & Feed Inventories Accounts Payable & Receivable Farm Income & Expenses Income Taxes Non-Farm Income & Expenses Interest Payments Depreciation Schedule

Profitability

- " The return or income received as a result of owner/manager inputs of labor, management and Capital into the business." But is that enough detail?
- Does that mean each year?
- What about depreciation (Economic vs. tax)
- What about family living?
- A farm that is NOT profitable cannot survive in the long run.
- Thus: need to look at Past, Present, and projected future income / expense streams.
- A TREND is needed to really determine LONG term profitability

What determines Profitability

- Sales Volume how many pots, how many plants, how many pints, quarts, bulbs, pounds, head, side, etc. of the item sold.
- Pricing prices of products, quality bonus, diff. market
 - Expenses costs going into products production, marketing, storage, etc.

How do we account for profits?

Cash

- Counts when an item is Sold -MONEY received
- Counts when an item is purchased - PAID for
- NET Income is at the bottom of the Schedule F
 - except Depreciation is a tax depreciation NOT Economic Depreciation - there is usually a huge difference

Accrual

- Income reported when products produced
- Expenses reported when inputs USED...
- Cash throughout year but +/inventories, production inputs on hand at beginning/ending of year

- Family living
- External sources
- Another business
- Off farm income

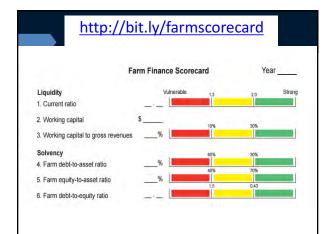

3 ways to increase profit

- 1. Increase income In the business
- More production, More acres
 - More greenhouses
 - More animals,
 - More milk
- Higher market price
 - Niche market
 - Higher quality

- 2. Decrease Expenses · In the business
- Concentrate on the top 3 to 5 expenses
- 3. Combination of the two
- And it's this approach we tend to look at closely
- No simple answer

Financial Measures on a farm

- Farm Finance Scorecard
 - Liquidity Balance Sheet
 - Solvency Balance Sheet
 - Profitability Income statement
 - Repayment Capacity "Cash flow" statement
 - Financial Efficiency from all the statements
- Benchmarking
 - Comparing yourself to others

The benefits of a business plan

- Shows how the business (YOUR business) will make money
- Determines the future financial plans, its needs, and what portion will be financially successful
- Outlines spending (and Income)
- Demonstrates how YOU will avoid pitfalls. (You've done the research)
- Need it for Funding sources Part of the loan package now
- Update the plan periodically Don't let it sit on the shelf gathering dust!!!!!

Benchmark Data – Farm Credit East Knowledge Exchange Partner, Vol 10, Iss. 6, June 2016							
Industry	Retail Farm Market	Equine	Greenhouse	Vegetable			
Current ratio	4.7	0.95	1.98	3.98			
% Net worth	80.8%	62.1%	73.3%	81.3%

THE UNIVERSITY OF MAINE COOPERATIVE Extension

Presentation adapted from

- Farm Financial Scorecard, UVM
- Measures of Profitability / Farm Financial Scorecard by Glenn Rogers – Professor emeritus – UVM Extension
- Establishing and Using a Farm Financial Record-Keeping System, University of Tennessee, Knoxville
- Beef Price & Yield Estimator, Matt LeRoux, Cornell

THE UNIVERSITY OF MAINE Cooperative Extension

FSA Borrower Training Meet with any Educator

- Donna Coffin Piscataquis, Penobscot & Hancock
- Gary Anderson dairy & other livestock
- Rick Kersbergen Waldo & dairy
- Caragh Fitsgerald Kennebec
- Kathy Hopkins Somerset
- Other counties in Southern Maine

Borrower Training Check-in FARM SERVICE AGENCY

- A. Describe goals, changes needed to reach goals, present and projected budgets
- B. Maintain recordkeeping system (production & financial), household budget, statement of financial condition & accural adjusted income statement.
- C. Understand and utilize income statement

	ng Score	
Scor	Criteria Used to Determine Score	Agency Consideration
1	If the applicant: Attended sessions as agreed, Satisfactorily completed all assignments, and Demonstrated an understanding of the course material.	Training requirement associated with course is complete.
2	If the applicant: Attended sessions as agreed, and Attempted to complete all assignments, but Does not demonstrate an understanding of the course material.	Training requirement associated with course is complete. Additional Agency supervision may be necessary.
3	If the applicant: Attend sessions as agreed, or Attempt to complete assignments, or Otherwise make a good faith effort to complete the training.	Training requirement associated with course is not complete. The borrower is ineligible for future direct loans until training is completed.

Evaluations - From Extension & from FSA

- All registered folks will receive this weblink to a course evaluation from UMaine Extension. <u>http://conta.cc/2pZIwFI</u>
- FSA Borrower Training Folks after meeting with educator will receive a course evaluation from FSA

Please - Please - Please

• Complete these evaluations to make this type of course available in the future.

THE UNIVERSITY OF MAINE Cooperative Extension

Thank you and best wishes in the future success of your farm venture
