

Garden Coaches help their Gardeners make growing decisions based on their personal preferences, how much sun their garden will get, and how many plants can flourish in their containers. Depending on which vegetables gardeners choose, Garden in a Box containers typically hold 3-6 seedlings. Vining crops are generally allowed to run rampant, rather than being trellised or staked. Remember to consider the mature size of the plant when planning your garden!

Here is a list of selected seedlings available from our local farm partners:

Basil-Genovese (Marr Pond Farm)

Beans-Provider (Ripley Farm)
