Hoop House Site

- ❖ Location - Slope (flat if possible)
- ❖ Sun - as much sun as your site allows
 - In winter the sun will be MUCH lower in the sky
- ❖ Winds - is your site sheltered by trees or a building, or is it open and exposed?
- ❖ Secure the house to the ground

Soil Preparation

❖ *Soil Test*

❖ *pH should be close to 6.5*

❖ *Organic Matter - 5% or higher*

- *Yearly additions of materials such as compost, grass clippings, fall leaves, animal manures (120 Days to Harvest)*

❖ *Fertility - per your soil test recommendations*

- *In winter little fertilizer is needed*
- *More growth and fertilizer need in spring and fall*
- *Fertilizers i.e. complete fertilizers (NPK), fish emulsions, liquid, granular (your choice)*

Spinach - the Hardest of Winter Greens

Winter Planting Schedule

Source: A Garden for All
Seasons, Eliot Coleman,
2000

CROP	CULTIVAR	PLANTING DATES*
Mache	Vit	9/15-10/10
Scallion	White Spear	7/15
Spinach	Space	9/15
Tatsoi	***	9/15-10/1
Carrot	Napoli	8/1
Claytonia	***	9/15-10/1
Sorrel	De Belleville	**
Chard	Argentata	7/15
Minutina	***	9/1-9/25
Lettuce	Samantha	9/15-10/1
Beet leaves	Red Ace	9/1-9/10
Arugula	Selvatica	9/7-9/21
Escarole	Coral	7/15-8/1
Endive	Salad King	7/15-8/1
Radicchio	Augusto	7/15-8/1
Chicory	Bianca	8/15-8/21
Parsley	Riccia	7/15
Mizuna	Forest Green	9/1-9/21
Dandelion	***	7/15
Turnip	Ameliore	9/1-9/15
Mustard	Hakurai, Red Giant	8/21-9/1

* Planting dates are for Zone 5.

** Sorrel is a perennial. Plant seeds in spring. In late August divide the plants and transplant to the frame.

*** No named cultivars.

Site Rotation

- ❖ *Important for soil - to avoid build up of soluble salts*
- ❖ *Winter Site 1*
 - *Plant July - September*
 - *Move house to area by October*
- ❖ *Spring Site 2*
 - *Plant in late March/early April*
 - *Move house to area as soon as the snow is melted and you can move the house*
- ❖ *Summer Site 3*
 - *Plant seedlings indoors in February-March, transplant outdoors late-April/early-May*
 - *Move house to area 2 weeks before setting seedlings out*

Row Covers

- *Serve as the second layer*
- *In theory 1 growing zone per layer*
- *Agribon, Remay etc., trade names*

Note:

Rows are 30 inches wide

Winter

Ventilation

Winter - none needed

Spring - some needed

Summer - a LOT needed

Spring

Outside View

Inside View

Vent Arm

Summer

Tomato and Vine Crop Trellis System

Roller Hook

Rain Barrels

Fertigate via rain barrel

*Downspout Metal
Diverter*

Drip Irrigation

- ❖ *Uniform, deep watering and doesn't wet the foliage*
- ❖ *Fertigate (add fertilizer to drip lines)*
